

PC-Plus Series

Powered Cylinder Subwoofers

World-class bass, compact footprint.

Powered Cylinder: Plus Series

The PC-Plus, as with many of our subs, has a modest and subtle exterior design which belies the interior of a brutally powerful, supremely accurate beast. Includes our awesome SVS "Plus" woofer, a staggering 525 watt BASH digital hybrid amp, and the "Tri-power" port variable tuning system adopted from the top-of-the-line PC-Ultra.

16-46 PC -Plus

As transparent on music as they are muscular on movies, the 16-46PC+ offers the pinnacle of space saving design, easy-to-move light weight, and simple, modern exterior design. It's the sort of low frequency performance that once cost thousands to attain. Arguably the deepest bass available from any brand. **MSRP \$949**

20-39 PC-Plus

This is one sub that does it ALL. Music, movies, anything you throw at it. With the variable tuning using interactive port block and selectable BASH subsonic filters, you can tweak the sound for your room or enjoy it "stock" out of the box. **MSRP \$899**

25-31 PC-Plus

The compact 25-31PC-Plus provides the most "punch" of the PC+ family and better suits many customers after compact bass solutions. For high power music venues, it's indisputably king in the class. **MSRP \$849**

PC-Plus Features:

- Computer Assisted Design (CAD) enclosure
- SVS designed/built custom Plus 12.3 woofer
- Built-in 525 watt BASH amp
