

# Plus 12" Series Small Box Subwoofers

Industry leading size, price, performance.

## SB-Plus Series

SVS is known for big subwoofers, but we put everything we know into our first truly small one, and it shows. State-of-the-art features, and elegant styling. Looks as good with the grill off as it does with it on... thanks to our "neo" magnet retainers and rubberized grill isolation points. This is the perfect SVS sub for small to mid-sized rooms where you want great sound to be as compact as possible.

## SB12-Plus

There's some good reasons we waited so many years to introduce our first truly small sub. Chief among them? It's really difficult to make a really worthy small sub. Few on the market are both affordable and good (and there are plenty which are neither).

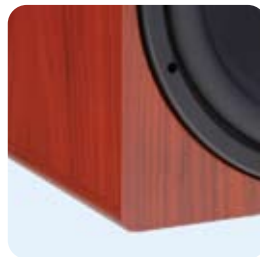

When the SB12-Plus was conceived, we resolved that any small sub from SVS would be among the best of its kind in this size and price class. Expect this new SVS to compare favorably to bulk of other small subs often costing 2-3 times as much.

We think you'll be glad you waited for this. Finally, a really compact sub that's good enough to be called an "SVS". The SB12-Plus, comes in five attractive and practical finishes... and more features than you can shake a stick at.

Starting at \$699

AVAILABLE FINISHES
